310 Tempering's Titan Series Phantom Shower Door Wins USGlass Magazine 2018 Readers' Choice Award

Innovative All-Glass Support System Earns Industry Recognition

Louisville, KY — December 12, 2018 — 310 Tempering is proud to announce that its Titan Series Phantom shower door has been named the winner of the USGlass Magazine 2018 Readers' Choice Award in the shower doors/hardware category. The award recognizes the Phantom's groundbreaking all-glass support system, which redefines the standard for frameless shower door design.

At the heart of the Titan Series Phantom is a revolutionary all-glass header that replaces traditional heavy metal support bars with a sleek 3 1/8-inch tall, double-rail header constructed from three pieces of 3/8-inch low-iron tempered glass laminated with a structural interlayer. The result is a minimalist, barn-door-style double-sliding glass system with overlapping panels ranging from one to three inches — maximizing clear glass visibility while dramatically reducing visible metal hardware. The Phantom is available in the following hardware finishes — chrome, brushed nickel, oil rubbed bronze, brushed bronze, matte black and satin brass — to complement a wide range of bathroom aesthetics.

Safety and durability were central to the Phantom's design. Its patent double-rail configuration ensures that if the outer rails sustain damage, the doors remain safely in place and can still slide open for emergency exit. This commitment to both form and function is what sets the Titan Series Phantom apart in a competitive market.

"We are honored to receive this recognition from USGlass Magazine and its readers," said 310 Tempering Co-Owner / Founder, Greg Abrams. "The Titan Series Phantom represents our dedication to pushing the boundaries of glass design while never compromising on safety or quality."

About 310 Tempering

310 Tempering is a Louisville, Kentucky-based glass fabricator specializing in tempered, laminated, and specialty glass products for residential and commercial applications. With a commitment to innovation and craftsmanship, 310 Tempering continues to set the standard for quality in the glass industry.
